The **Patient Medication List** offers several filtering options for viewing medications and allows the process of administering medications without requiring access to a specific patient's account.

den

- To administer medications from the Patient Medication List, scan the patient's armband to launch directly to the MAR.
- Double-clicking on one of the medications in the list will also launch the patient's MAR.

Select the applicable filters to categorize the information needed on the medication list.

The filter available for selection include:

- Nurse Filters: My Patients
- Department Filters: Department (Med Surg, ICU, etc.)
- Pharmacy Order Filters: Non-IV, IV, Controlled Substances, Diabetic Record, Treatment, Linked, Antimicrobial Orders
- Frequency Filters: X1, Stat, Diabetic Record
- Scheduled Filters: Due, Scheduled, PRN
- The filters can be setup on the role or facility. Users also have the option of creating their own. See the <u>Updated EMAR/MedVerify User Guide</u> and <u>Filter Builder</u> document for more information regarding the filter options and how to create the filters.

Select the date/time range to filter the information needed on the medication list.

- The date/time range feature reduces the amount of data on the screen and will only display what is within that specific timeframe for the filters selected.
- The times (not the date) are will be remembered when returning to the Patient Medication List screen the next day.
 - Example: In the screenshot above, the range is set for 0700-1900 on 9/12/22. The following day, the same 0700-1900 time will display but the date will change to 9/13/22.

To export a PDF of the filters selected from the Patient Medication List, select the PDF option and the selections made will be displayed in a report that may be printed if desired.
