

Future Orders Updates in v22.05

As part of the TruBridge EHR 22.05.00 release, any sites using Future Orders version 5 will automatically be transitioned to version 6. For more information on this transition, see the [Deprecation of Future Order Entry v5 & Transition to Future Order Entry v6](#) announcement.

In addition, the 22.05.00 release includes several updates to Future Order functionality and workflow. This document describes these changes.

Future Orders Tasks Folder

Multiple enhancements have been made to the Future Orders Tasks folder.

- Field Name Changes:
 - My Orders** (previously **My Patients**)
 - Order Entered Date** (previously **Orders from:** and **Orders to:**)
- The **Order Entered Date** range field now defaults to the last 90 days, rather than the last 30 days.
- A **Search** field has been added that may be used to narrow results by searching the patient or ordering provider name. (The placeholder text in the search box displays "Search Patient or Provider.")
- The screen now displays orders on the visit level, rather than the profile level. In addition, the screen layout has been updated to match the provider E-Sign queue. The following columns will display:
 - Patient Name
 - Date of Birth
 - Description
 - Start/Schedule Date
 - Entered Date

- Expire Date
 - Order Type – e.g., Verbal, Telephone, Written, Protocol, CPOE
 - Status – e.g., SIGNED, UNSIGNED, UNSIGNED (RELEASED)
 - Ordering Provider
- The Future Orders folder in the Tasks application can be viewed by non-provider roles with the ability to Cancel Selected (Unreleased) Orders. Only providers will have the option to Sign Selected Orders.

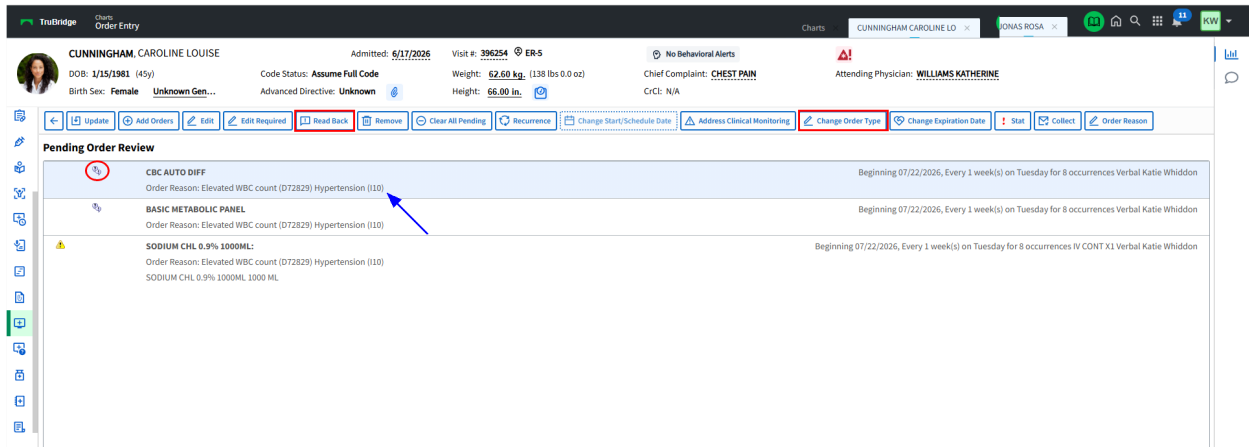

Future Orders for Nursing

Several enhancements have been made to the Future Orders application for Nursing.

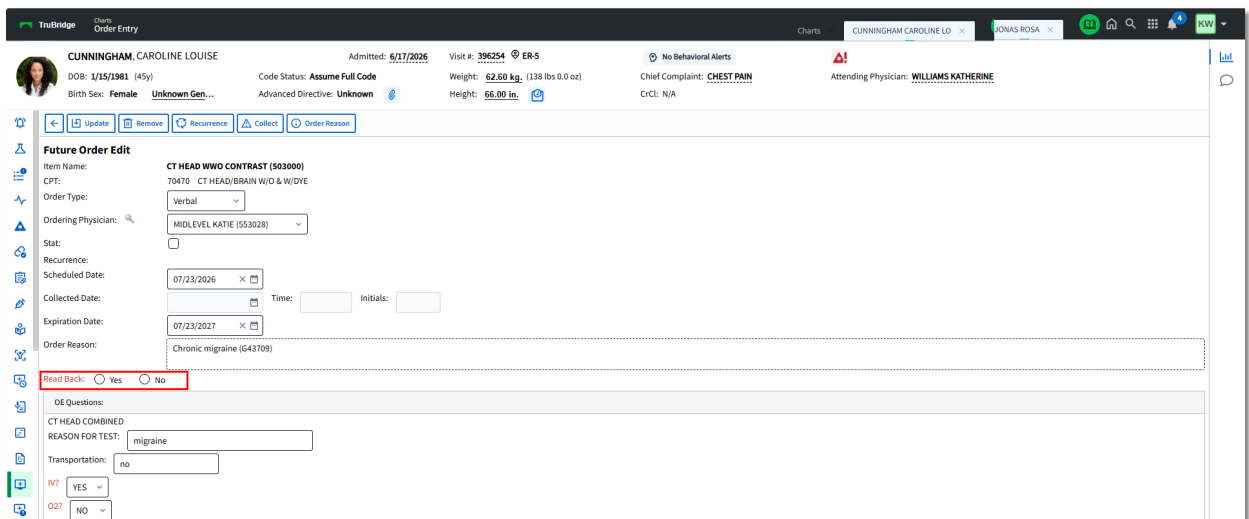

- **Order Type drop-down:** Nursing may now select an Order Type when placing orders for a patient.
 - Available Order Types are **Written, Verbal, Telephone, and Protocol**.
 - The Order Type will be reflected in the Future Order Detail screen, Order Detail, the Tasks Screen E-Sign folder, and in Order Chronology.
 - The Future Orders application will look at the Order Entry application behavior controls that have been granted to the user within System Administration. (See below for recommended behavior controls.)
- **Ordering Physician drop-down and lookup:** Nursing is now able to select an ordering physician for Future Orders, which will then display the order under that provider's Future Orders Tasks folder for them to sign.
 - The attending provider on the selected visit will default to the **Ordering Physician** field. Any other providers listed on the patient's visit may also appear in the drop-down. A magnifying glass is available to choose from the Physician List lookup screen.
- **List Type:** The **Protocol** option has been added to the **List Type** drop-down. Selecting Protocol here will also change the Order Type to Protocol and vice versa.

- **Change Order Type:** This new button is available from the Pending Order Review screen.
 - Select the order(s) that need to be changed to enable the option. Once the orders are selected, select **Change Order Type**. A pop up will appear that allows the user to select from Written, Verbal, Telephone, or Protocol.
 - Please note that a Redirect option will NOT be available for phone, verbal, or protocol Future Orders.

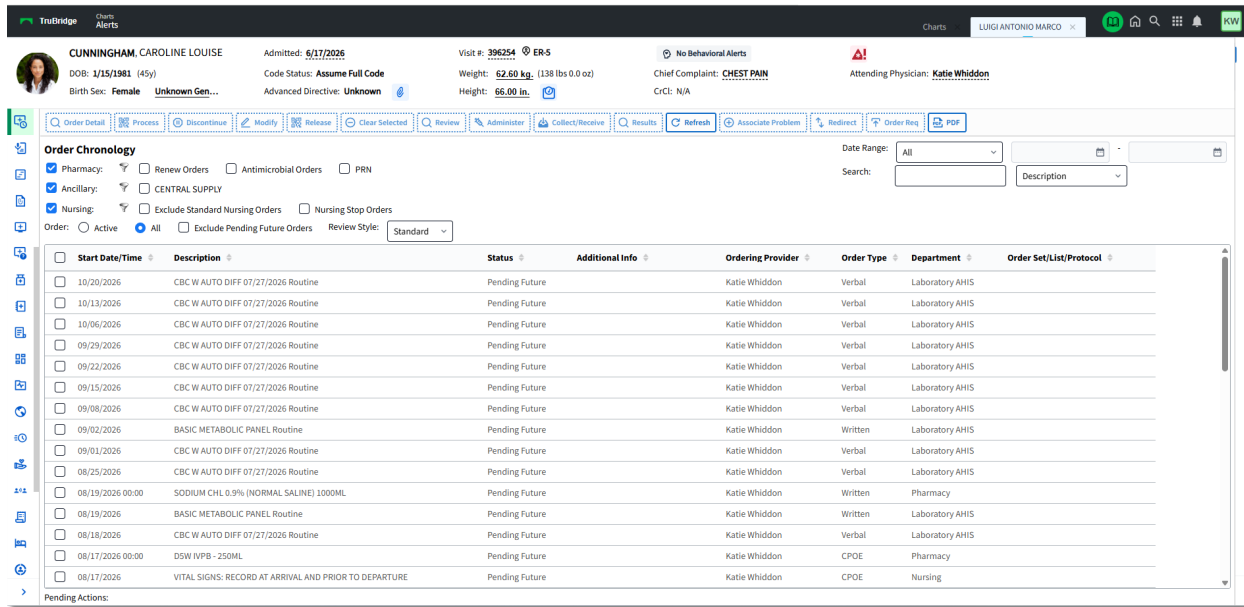

- **Readback:** The **Readback?** question and radio button have been added.
 - The Readback question that is available from Nursing Order Entry is now available in Future Order Entry. It is available to select from within the Order Edit screens or from the Action Bar on the Pending Order Review screen within Future Order Entry.
 - The Readback label will display in the Future Order Detail and Order Detail screens.

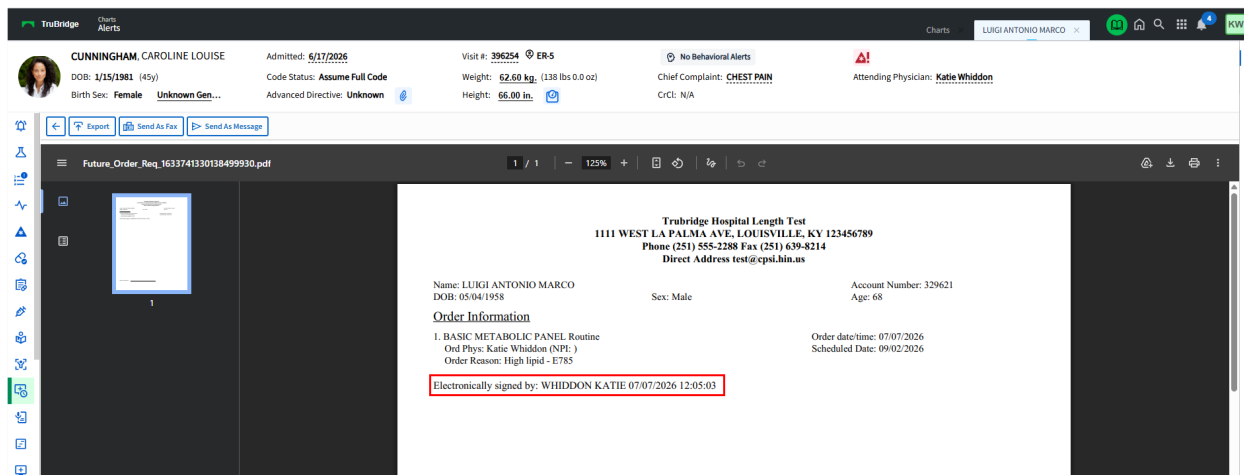

Future Orders – Releasing Future Orders and Future Order Detail

Additional changes that have been made with the v22.05 updates include the following.

Start Date/Time	Description	Status	Additional Info	Ordering Provider	Order Type	Department	Order Set/List/Protocol
10/20/2026	CBC W AUTO DIFF 07/27/2026 Routine	Pending Future		Katie Whiddon	Verbal	Laboratory AHIS

08/19/2026 00:00	SODIUM CHL 0.9% (NORMAL SALINE) 1000ML	Pending Future		Katie Whiddon	Written	Pharmacy	
08/19/2026	BASIC METABOLIC PANEL Routine	Pending Future		Katie Whiddon	Written	Laboratory AHIS	
08/18/2026	CBC W AUTO DIFF 07/27/2026 Routine	Pending Future		Katie Whiddon	Verbal	Laboratory AHIS	
08/17/2026 00:00	DSW IVPB - 250ML	Pending Future		Katie Whiddon	CPOE	Pharmacy	
08/17/2026	VITAL SIGNS: RECORD AT ARRIVAL AND PRIOR TO DEPARTURE	Pending Future		Katie Whiddon	CPOE	Nursing	

- Order Chronology will now display the order type for Pending Future orders. CPOE will display as the type for any orders that are placed via CPOE and signed by the provider. Telephone, Verbal, Protocol, or Written will display for orders placed by nursing. Previously, these all displayed as Written.
- The Order Requisition will display the label **Electronically signed by: [provider]** with the date and time of the signature.
 - This will reflect the time the provider placed the order via CPOE or the time the provider signed the order from the Future Order Tasks folder. This label will only appear once the order has been signed.
